VINAY GOUD

Unity Developer

+91 9390315371 | vinayvvv992@gmail.com | Itch.io | Portfolio

PROFILE

Unity Developer with 2+ years of professional experience in developing games for PC, web, mobile, and XR platforms. Develop and implement gameplay systems, game mechanics, player interactions, and core features, including multiplayer gameplay using frameworks such as Photon and Mirror, and NFT integration with Ethereum and Solana wallets.

WORK EXPERIENCE

Game Developer (Contract) — Anahata Interactive, Hyderabad (Remote) *Apr 2026 – Jul 2026*

- **18 Days (in development):** Developed core mechanics for a Photon Fusion strategy game, card-based troop deployment, troop combat and health systems, archer units with parabolic arrow trajectories, and Firebase-backed save data with Google sign-in.
- **Froggy (in development):** Building a platform-jumping game with a parabolic trajectory preview for landing spots, plus a coin-collecting score system.
- Developing WebGL titles Wavytrip and Grass Cutter.
- Integrated Google AdMob across Anahata's Android titles.
- Integrated REST APIs and Firebase services (Auth, Analytics, cloud save data) into Unity titles.

Unity Developer (Contract) — Versus (Remote) *Nov 2025 – Mar 2026*

- Built NFT-based player skins for Coco Simulator, a multiplayer WebGL game, with wallet-based ownership determining which skins a player can equip.
- Implemented the initial Ethereum integration with thirdweb and MetaMask, then migrated it to Solana with Phantom wallet using the Solana Unity SDK when the project changed direction.
- Took the project to roughly 90% completion before it was paused pending funding.
- Published a multiplayer-only version (Photon PUN 2, real-time scoreboard and chat) as “Coconuts Vs Nothing” on itch.io, with Versus's permission.

XR Developer — EdgeForce Solutions, Hyderabad *Nov 2023 – Mar 2025*

- **Shooting Module:** Programmed a Mirror-networked hostage-rescue demo — real-time shooting, health systems, pathfinding, enemy AI.
- **Digital Circuits (3D):** Built a Unity VideoPlayer trainer for 70+ circuit videos using Scriptable Objects, Service Locator, and Observer pattern to trigger a rotatable, zoomable 3D model whenever a key component appeared mid-video. Core contributor.
- **Gun Handling (MR):** Developed a Meta Quest Pro combat scenario with NavMesh-driven enemies that pursue, engage, and damage the player.
- **Welding Simulation:** Core contributor on the full simulation; implemented corner-pivoted rod mechanics and shader-driven weld marks, optimized with object pooling.
- **Painting Simulator:** Customized a Unity Asset Store tool with heatmap-based paint tracking; co-engineered a spray controller with hardware teams.
- Contributed to an AI chatbot on Meta Quest 3, sending data to a local server over WiFi via HTTP web requests.

PERSONAL PROJECTS

- **Space Chaos —** 2D space shooter, published on itch.io.
- **Happy Town, Hopeless, Pass Through, Battle Royale, Touch Me —** diverse titles spanning arcade, simulation, and action genres.
- **Laws of Newton —** VR educational game using bowling to teach Newton's first and second laws and tennis to teach the third law.
- **Wisdom Tales —** published on Google Play Store (later delisted); interactive storytelling for young audiences.

SKILLS

- **Languages:** Proficient in C#
- **Game Engines:** Unity (Primary), Unreal (Basic)
- **Multiplayer:** Photon PUN 2, Photon Fusion, Mirror, Netcode for GameObjects
- **XR / VR / MR:** XR Interaction Toolkit, OpenXR, Mixed Reality (Meta Quest Pro)
- **Web3:** NFT integration, thirdweb, Solana Unity SDK, MetaMask, Phantom
- **Backend / Integration:** REST APIs (UnityWebRequest, JSON), Firebase (Auth, Analytics, save data), Google AdMob
- **Core Concepts:** OOP, Design Patterns, Scriptable Objects, Service Locator, Observer Pattern, Object Pooling, FSM, AI/NavMesh Pathfinding, Addressables, Shader Effects, REST/HTTP Integration
- **Platforms:** Mobile (Android), Desktop (Windows, macOS), WebGL, VR/MR (Quest)
- **Tools:** Git, GitHub

EDUCATION

MSc — Game Technology | 2021 – 2023
ICAT College, Bangalore (Alagappa University)
